P7.....	SEARCH BY CAR
P12.....	SHOPPING CART

WHEEL SEARCH:

Wheel search is the default page that you will land on once logged in. It allows you to manually search for wheels by specification and detail, as opposed to searching by car. That said, if you want to order wheels using the wheel search by specification, then at some stage Dealer Shop will still ask you to identify the vehicle for fitting kit purposes.

Article Search

The first way to search is "Article Search", here you can enter a short code in a specific format to find the wheel that you want more quickly.

For example, if you would like to find Autec Z in 7.0 x 17 then you would first enter the width and diameter of the wheel in this format "7017" followed by the wheel make "autec" and the model "z" so the whole short code would be "7017autecz".

Wheel filter

The wheel filter sorts the wheels by specification including PCD, offset, width, diameter, wheel manufacturer, model and colour.

TIP: Remember to "Reset Filter" when you finish searching, so that you can start a new search!

Left Column Options // Availability

This option allows you to either search everything or only items that are in stock.

Left Column Options // Dealer Price

A screenshot of a filter menu titled "DEALER PRICE" with a minus sign icon. It contains two radio button options: "Show Dealer Price" (which is selected) and "Hide Dealer Price".

This option allows you to either show or hide your dealer price for those moments when a customer may be looking over your shoulder, however we do recommend using the more customer friendly <http://configurator.automotivewheels.co.uk> which allows you to check the customer vehicle, check stock and view on vehicle without showing any prices.

Left Column Options // Manufacturer

A screenshot of a filter menu titled "MANUFACTURER" with a minus sign icon. It contains a "Reset filter" option with a blue 'x' icon, and three unchecked checkbox options: "Autec", "Borbet", and "Ronai".

This option allows you to filter results by the wheel manufacturer.

Left Column Options // Diameter

A screenshot of a filter menu titled "DIAMETER" with a minus sign icon. It contains a "Reset filter" option with a blue 'x' icon, and a list of unchecked checkbox options for wheel diameters: "13", "14", "15", "16", "17", "18", "19", "20", and "22". A vertical scrollbar is visible on the right side of the list.

This option allows you to filter results by the wheel diameter.

Left Column Options // Colour

This option allows you to filter search results by wheel colour.

Left Column Options // Price

This option allows you to move the sliders to set a budget range per wheel or a maximum spend per wheel.

TIP: The Price filter filters the dealer price not the retail price.

Filtered Results

With any of the filters, results update automatically. Results show an image of the wheel, its name and spec/description, the net dealer price and the stock indication. Stock information advises how much stock in a traffic light colour system, it also advises how long delivery will take. Stock from the UK may take 1-2 working days and from Europe 3-4 days. You can also sort the way in which results appear for example, by price or stock.

MAKE OF CAR: BMW	MODEL: 3 SERIES	BODYWORK: SALOON	TYPE/YEAR OF CONSTRUCTION
Alfa Romeo	1 Series	convertible	3 Limousine (3L (F30)/Facelift) 2012 -
Audi	3 Series	compact	3 Limousine (3L/Facelift) 2010 -
Bentley	5 Series	coupe	3 Limousine (390L (E90/E91)/Facelift) 2008 - 2011
BMW	6 Series	estate	3 Limousine (4x4) (390X (E90/E91)/Facelift) 2008 -
Cadillac	7 Series	saloon	3 Limousine (4x4) (390X (E90/E91)) 2005 - 2008
Chevrolet	8 Series		3 Limousine (390L (E90/E91)) 2004 - 2008

Start by selecting the appropriate vehicle and derivative, this can get quite in depth, but this fitment guide works directly from TÜV certificates, so when you select a vehicle you are actually ensuring that what you are selecting is approved for use on the specific derivative of vehicle without concern of specific fitment issues such as brake calliper or load rating issues etc. You can also download the PDF certificate at any time if the customer or insurance companies request it.

Horsepower/kW	Fuel	Drive				
All	All	All				
330d (E90)		2008-2010	245 PS / 180 kW	2993 ccm	diesel	RWD
316i (E90)		2008-2010	116 PS / 85 kW	1596 ccm	petrol	RWD
316i (E90)		2008-2010	122 PS / 90 kW	1599 ccm	petrol	RWD

3 LIMOUSINE (390L (E90/E91)/FACELIFT) 2008 - 2011

[Delete and go back to car selection](#)

Once the vehicle is selected, you will see a side view of the vehicle as a preview (available on most car models):

Here you will be shown all available wheels in all available sizes, you can see all designs by using the right arrow to navigate. By selecting a wheel size (shown under each wheel image) you will be shown a preview of the wheel on the vehicle. You can also change the colour of the car by selecting a colour option (top right) or lower the car (top centre).

TIP: If you are with a customer, use the car search and previewer through <http://configurator.automotivewheels.co.uk> as everything as above and below is shown, but without any pricing.

Left Column Options // Availability

A screenshot of a filter menu titled "AVAILABILITY" with a minus sign icon. It contains two radio button options: "Show all" and "Only if in stock". The "Only if in stock" option is selected.

This option allows you to either search everything or only items that are in stock.

Left Column Options // Dealer Price

A screenshot of a filter menu titled "DEALER PRICE" with a minus sign icon. It contains two radio button options: "Show Dealer Price" and "Hide Dealer Price". The "Show Dealer Price" option is selected.

This option allows you to either show or hide your dealer price for those moments when a customer may be looking over your shoulder, however we do recommend using the more customer friendly <http://configurator.automotivewheels.co.uk> which allows you to check the customer vehicle, check stock and view on vehicle without showing any prices.

Left Column Options // Manufacturer

A screenshot of a filter menu titled "MANUFACTURER" with a minus sign icon. It contains a checked "Reset filter" option and three unchecked checkbox options: "Autec", "Borbet", and "Ronai".

This option allows you to filter results by the wheel manufacturer.

Left Column Options // Diameter

This option allows you to filter results by the wheel diameter.

Left Column Options // Colour

This option allows you to filter search results by wheel colour.

Left Column Options // Price

This option allows you to move the sliders to set a budget range per wheel or a maximum spend per wheel.

TIP: This filters the dealer price not the retail price.

Once a wheel is selected, you will be shown these details and options:

7,5 x 17 ET 34 8 x 17 ET 34

Adding Tyres? ?
Suitable tyre sizes for the selected wheel above

Fit wheel with 205/50R 17 Fit wheel with 225/45R 17

You are shown available wheel specs in the chosen diameter (selectable spec options by tab along the top), the full wheel spec, the fitting kit part number (if required). Then you can download the TÜV approval certificate and print or show the wheel details. The net dealer price is shown on the right along with stock and the option to add to cart. Below the wheel spec are the recommended tyre sizes according to the approval certificate.

SHOPPING CART:

Once added to the shopping cart, view your shopping cart by the option on the main grey menu through the mini-cart in the top right of the screen.
